Disk File

C:\Users\pooj\thelun\OneDrive\Documents\Virtual Machines\Other Linux 2

Capacity

Current size: 320 KB
System free: 832.6 GB
Maximum size: 2 GB

Disk information

Disk space is not preallocated for this hard disk.
Hard disk contents are stored in multiple files.

Disk utilities

Map this virtual machine disk to a local volume.

Map...

Defragment files and consolidate free space.

Defragment

Expand disk capacity.

Expand...

Compact disk to reclaim unused space.

C:\Users\gool\p\h\at\Virtual Machines\Other Linux 2.2.x\Other Linux 2.2.x.vmx

Capacity

Current size: 320 KB

Add Hardware Wizard

Specify Disk Capacity

How large do you want this disk to be?

Maximum disk size (GB):

Recommended size for Other Linux 2.2.x kernel: 8 GB

☐ Allocate all disk space now.

Allocating the full capacity can enhance performance but requires all of the physical disk space to be available right now. If you do not allocate all the space now, the virtual disk starts small and grows as you add data to it.

☐ Store virtual disk as a single file

☒ Split virtual disk into multiple files

Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.
